Strategy™	C18-3	C18	3 µm	The high bonding density of C18-3 facilitates a stronger separation of non polar compounds. Multi step bonding technology guarantees a fully end-capped phase, stable under basic pH conditions. C18-3 is an excellent phase for the integral separation of basic drugs up to pH : 12.	mono-functional	22%	Multi step	1 - 12	L1	100 Å	425 m ² /g
