ATS COMPLIANT BAG COLLECTION AND SAMPLING KIT

This kit includes an inspiratory gas filter to reduce the concentration of NO in inspired air to < 5 ppb and 12 L Mylar® bags to collect the entire vital capacity at a flow rate of 350 mL/s. The bags are equipped with Luer caps to seal the bag after sample collection. The kit includes adapters and three-way valves for analyzing the samples using the NOA.
Part Number: CBSK 01410
