

Gels / resins

From the research laboratory to full scale manufacturing, Tosoh offer the same polymer chemistries in TSKgel and Toyopearl products. Whether you are scaling up from a TSKgel column hplc method to Toyopearl for manufacturing, or are scaling down from a Toyopearl purification to the corresponding TSKgel column for the QC of your target, Tosoh makes it easy to develop methods to do both.

- [Size Exclusion \(SEC\)](#)
- [Ion Exchange \(IEC\)](#)
- [Hydrophobic Interaction \(HIC\)](#)
- [Mixed Mode Chromatography \(MMC\)](#)
- [Affinity \(AFC\)](#)
