

HPLC Standard System

Thermo
SCIENTIFIC

HPLC is a primary tool for many chromatography laboratories, but specific system requirements vary greatly from one application to another. The UltiMate 3000 [Standard Analytical systems](#) are designed to meet today's requirements and future challenges. They offer full support of all HPLC applications and provide UHPLC compatibility – allowing you to move to UHPLC whenever you are ready.

- Future proof standard LC systems
- 620 bar maximum pressure and 100 Hz data rate for UHPLC compatibility
- Industry leading range of detectors
- x2 Dual LC system solutions for increased sample throughput
- Advanced automation for on-line SPE-LC, 2D-LC, or purification tasks
