Stereotaxic Instruments for Mouse

Just for Mouse™ Stereotaxic Instruments

THE JUST FOR MOUSE™ STEREOTAXIC INSTRUMENTS is ideal for researchers working with mice and other small rodents. Precision alignment when using the Just for Mouse™ Stereotaxic ensures accurate placement of electrodes, micropipettes, cannula and other devices.
Advanced digital and motorized versions include a zeroing function allowing the user to target specific coordinates in the brain for injection, implantation, etc. Calculation of distance measurements is thus no longer necessary.
The Just for Mouse™ Stereotaxic Equipment is available in manual, digital and motorized versions.
